- Maximum counter thickness: 35mm
- Ensure balanced feed pressures between 1-5 bar

## Product Care

- Our finishes require both drying after use as well as careful & regular cleaning routines.
- Water pH should be balanced between 6.5 - 8.5 and should be free of minerals.
- Normal cleaning should only be done with mild liquid soap in warm water, applied with a microfibre cloth.
- Mineral buildup can be removed with lemon juice in water, applied with a microfibre cloth and then rinsed.
- Occasional application of a premium quality car body wax will help reduce mineral based standing water marks.
